## ROCK TAPE

Did you know we offer rock tape at the spa? Rock tape is a therapy method that is especially helpful in healing sports injuries. Rock Tape assists with functional body movement, and can help alleviate pain. **The tape lifts the skin away from the fascial tissue in order to increase fluid movement under said tissue and relieve that "tight" sensation.** It also activates neural signals to the brain signaling that there is an issue in the spot where it has been placed, increasing the body's focus on healing that area.

Do you think rock tape therapy would be beneficial to you or someone you know? **Give us a call at 207-907-4263** to set up an appointment!
